

BOSMAN ADAMA

12 May 2023

With regards to Globalgap inspections the following in addition to the compliant documentation concerning vines cultivated at Bosman Adama (Certificate nr. 10229)

1. Written proof that no GMO's are being cultivated.
No GMO's are being cultivated. The vines we supply to you are GMO free.
2. Is the plant material certified?
Certified plant material is bought from Plant Improvement Organisations, unless a specific cultivar is only available as uncertified in general.
3. Proof of registration of nursery.
Attached to this documentation
4. Is quality guarantees for plant material available?
Yes, as determined by the certification.
5. Does vineyard plant material receive heat treatment against bacterial illnesses?
Yes, all plant material is collected from mother blocks that are treated for bacterial illness.
6. Is the nursery plant material treated against crown gall (*Agrobacterium vitis*)?
Yes, all plant material is collected from clean mother blocks.
7. Any proof of spray and fertilising records in the nursery?
Yes, attached to this documentation. All dormant material is treated with Merpan SC throughout the different stages in the nursery.
8. Organic vines?
Hereby we confirm that to our knowledge there are no organic grafted vines available in South Africa and that is why we supply you with conventional material.
